

Welcome to MoraSmallBiz.com. I'm Beth Mora.

PowerPoint Presentations – when your professional image counts!

Sometimes you have the opportunity to make a presentation. Make the most of this opportunity with a PowerPoint Presentation.

To Create Your Image in a PowerPoint Presentation, call today!

PowerPoint presentations can enhance your professional image when you:

- present your Business Plan to potential backers
- make a speech about your company to local business groups
- present a sales talk to a potential customer or client
- add information to your display booth at any function

Using PowerPoint effectively is critical to your success. The screens should be readable, color balanced to enhance your message and more than just “speaker notes”. Individual slide shows are as different as the needs of the people presenting them, and the audience they are targeted toward.

Done effectively, a PowerPoint presentation can add to your speech, while keeping the audience's attention on you. Your message should be the most important focus.

Call today for a “No More Boring Power Points” presentation!
